DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the amendment of 12/02/2004. It is noted that in the mentioned amendment, applicant has amended claims 1 and 3-9; canceled claim 2 and add new dependent claim 10. As a result, the pending claims are claims 1 and 3-10.

Specification

2. The lengthy specification which is amended by the amendment of 12/02/2004 has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

3. Claims 1 and 3-10 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The optical device as claimed in claim 1 is patentable with respect to the prior art, in particular, the U.S. Patent Nos. 5,583,428 and 6,324,330 by the limitations related to the formation of the reflecting surfaces, the junction surfaces, the entrance surface and the emergent surface of the body for guiding light. In particular, the prior art does not disclose the features thereof "the body includes the incident end...to the incident end" recited in claim 1, lines 6-13.

A review of the Patent '428 has resulted that the Examiner has agreed with the applicant's opinion. In particular, in the embodiment described in column 3 and

Art Unit: 2872

shown in figure 2 of the Patent '428, even though the surface (F1) is connected to the junction surface (F2); however, the first reflector (6) is not connected to the first junction surface (F2).

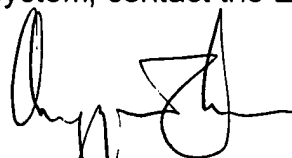

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
